<b>2015</b>			2.51	1.76	2.68	1.81	2.67	-6.09	2.96	2.64	3.42	1.54	<b>16.70</b>

- ❖ We adopt pure quantitative models with 20 years of back testing results. The methodology stays flexible enough to adapt changing environments. We test everything that can be tested!
- ❖ We do correlate with equity market in a 'positive' way. Correlation is high in the bull market but low in bear market.
- ❖ Trading strategy was inspired by lessons learned from the past titans. We learn from their mistakes and try to emulate them.
- ❖ We see our drawdowns as an 'investment' - no pains no gains. Drawdowns always provide us better entry point going forward.

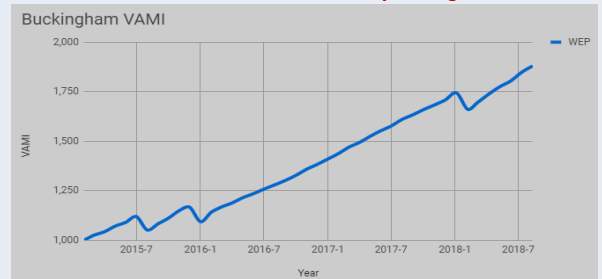

### Manager Background

- Buckingham Global Advisor is a Commodity Trading Advisors (CTA), registered with National Futures Association (NFA) and Commodity Futures and Trading Commission (CFTC).
- **Charles Dai**, the principal of the CTA, started trading client money since **March 2015**. Wei Qin was awarded Beta Gamma Sigma award, the highest award for business students. Wei Qin is also a CFA holder.

### Weekly Emini Program

- Buckingham's Weekly E-mini Program (WEP) is a commodity option strategy employing an absolute return investment approach. The Strategy primarily writes (sells) a series of out of money (OTM) call and put option naked or spread combination on S&P 500 E-mini futures.
- WEP focuses on short duration derivatives - the option expires within 2-8 days, because the time decay is the greatest in those final days. It does this primarily by identifying the option strikes with best risk/reward ratio according to our proprietary model.
- WEP aims for Sharpe Ratio +2.5 long term (5+ years) considering tail risk due to the economic cycles  
**2016 Barclay Hedge Awards: #6 in Option Traders Category**  
**2017 Barclay Hedge Awards: #4 in Option Traders Category**  
**Please note that the ranking applies only to those CTAs who Submit their trading results. The rankings in no way purport to be representative of the entire universe of commodity trading advisors.**
