

Trading Strategy: ST / Systematic / Option Writer / E Mini

Program Description: Weekly E-Mini Program is a systematic VIX-hedged option program guided by a proprietary trading model developed to trade the E-mini weekly volatility and designed to anticipate when the market is in or about to enter a turbulent time. WEP uses a proprietary options strategy, which includes options selling and options writing, to capitalize on the systematic entry signals produced by the program. The VIX futures hedging is designed to anticipate when the market is in or about to enter a turbulent time. WEP has been refined to achieve the desired returns while limiting account drawdowns. Products traded in WEP are E- mini S&P 500 futures and options and VIX futures. The program does not short VIX futures. WEP focuses on short duration derivatives - the option expires within 2-8 days, because the time decay is the greatest in those final days. It does this primarily by identifying the option strikes with best risk/reward ratio.
