Important Notes Regarding CTA Universe 1) Traders are included in a market segment regardless of the percentage of their portfolio trades that particular segment, 2) Some traders may have been eliminated from this report at the sole discretion of Autumn Gold, 3) The Autumn Gold Universe of CTAs does not include all CTAs.

Statistical Notes 4) Compound ROR (Annualized Compounded Rate of Return) represents the compounded rate of return for each year or portion thereof presented. It is computed by applying successively respective monthly rate of return for each month beginning with the first month of that period. It smoothes out returns by assuming constant growth, 5) Worst Drawdown represents the worst drawdown experience by a CTA, 6) Risk Adjusted Statistics measure how much risk is involved in producing return. The Sharpe Ratio, Calmar Ratio and Sortino Ratio are all risk adjusted measures, 7) The Sharpe Ratio has been calculated using a 1% Risk Free Rate of Return, 8) The Sortino Ratio has been calculated using a 5% Minimal Acceptable Rate of Return.

Investment Restrictions - QEPS Only: A Qualified Eligible Person must meet the following two requirements: 1) the investor must first be an accredited investor. The most common ways for this are to either have a net worth of \$1,000,000 or more OR an annual income of \$200,000 or more for the last two years OR, combined with a spouse, \$300,000 per year for two years, 2) the investor must meet an additional portfolio requirement, which is having \$2,000,000 in securities holdings OR \$200,000 in margin on deposit with a Futures Commission Merchant OR a combination of the two (for example, \$1,000,000 in securities and \$100,000 in margin).
